CMCC Doc. No. 151.814

Copy 2 of 4

Page 1 of 1

Dear George:

We have selected the engineering personnel from our organization whom we believe best qualified to supervise overseas installation and testing of airborne and ground-based units of System No. 2. These people are identified as follows:

25X1A

It is intended that [redacted] will concern themselves more or less exclusively with installation and test of airborne equipment. [redacted] will be concerned primarily with the installation of one ground station, while [redacted] will be concerned with simultaneous installation of a second ground station.

25X1A

Preparations are presently under way to secure inoculations, to the extent required, for each of the men listed. Because these men are required to operate at our plant on an overtime basis to ensure completion of System No. 2 on schedule, it will be impossible for them to receive the shots at [redacted]. Accordingly, arrangements will be made to secure the shots locally.

Information concerning previous possession of passports and such other information as you require is presently being compiled and will be forwarded to you within the next few days.

It probably will not be possible for any of these engineers to leave the country much before the end of March because they will be heavily involved in the preparation and testing of the first System 2 equipment units until that time.

Sincerely,

Burt

Burt
